## PIASENTINA STONE

Piasentina stone is a limestone with unique characteristics, a resource from the Friuli region to value and protect.

The extraction area is in the foothills of the Alps in the Friuli Venezia Giulia region, including an area in the province of Udine.

It is an elegant and versatile material, with a grey base, white crystalline veins and hints of brown.

Its excellent physical and mechanical characteristics and its adaptability have allowed **millimetri4** to use and highlight the qualities and aesthetic value of this precious local raw material.

PROPRIETÀ FISICO MECCANICHE Physical-mechanical properties / Propriete physico-mecaniques	Unità di misura Measure unit Unité de mesure	Valore medio Average value Valeur moyenne
Peso di volume Weight per Unit of Volume / Poids de volume	Kg/m³	2690
Assorbimento dell'acqua Imbibilion Coefficient (water absorption) / Absorption de l'eau	%	0,21
Carico di rottura (alla compressione semplice) Stress load(due to sole compression) / Charge de rupture (par simple compression)	Мра	145
Carico di rottura (alla compressione semplice dopo gelività) Stress load (due to sole compression following gelivity / Charge de rupture (par simple compression après gélivité)	Мра	144
Modulo elastico tangente Elasicity Modulus / Module élastique tangent	Mpa	72.600
Carico di rottura (a trazione indiretta mediante flessione) Stress load(due to indirect traction following bending) / Charge de rupture (par traction indirecte par fl exion)	Мра	30
Usura per attrito radente (riferimento al granito di S.Fedelino) Close friction wear(reference to San Fedelino granite) / Usure par frottement de glissement (référence au granit de S. Fedelino)	Мра	0,58
Resistenza all'urto (altezza minima di caduta) Impact Test (minimum fall distance) / Résistance au choc (hauteur minimum de chute)	cm	36
Coefficiente di dilatazione lineare termica Thermal Linear Expansion Coefficient / Coefficient de dilation linéaire thermique	x10^-6/°C	6,6
Microdurezza Knoop Knoop Microhardness / Microdureté Knoop	Mpa	1830
Indice di disuniformità della durezza Non-uniform hardness index / Indice de non uniformité de la dureté		1,35
COMPOSIZIONE CHIMICA: Chemical composition / Composition chimique		
CaCO <sup>3</sup>	93,90%	
MgCO <sup>3</sup>	0,00%	
FeCO <sup>3</sup>	1,30%	
Residuo insolubile in HCL HCL insoluble residue 4,52% / Rèsidu insoluble dans HCL	4,52%
